

Mohammed Safwan

Technical Lead & Full-Stack Developer

safwancoding1919@gmail.com · +91-7892104273 · Mangalore, Karnataka, India

PROFILE

I am a computer science engineer and technical lead who manages the entire development cycle - from writing the first line of code and reviewing every pull request to pushing releases to the Play Store, the App Store and production web.

Day to day I work across React Native (Expo), Next.js, Firebase and Fastify, with PostgreSQL or Firestore behind it. I have shipped a masjid community platform live on three stores, a school ERP with 93+ API endpoints and ten role scopes, and a fashion e-commerce storefront with a full admin dashboard.

As a lead I handle architecture decisions, enforce coding standards through reviews, translate business requirements into technical plans, and make sure things stay stable after launch. I like typed code, small pull requests and shipping on schedule.

SELECTED WORK

Minara Masjid community platform, live on three stores

2025 · Full-Stack Developer & Team Lead · minaraapp.in

A masjid community app with five user roles and strict role-based access control across iOS, Android and web. Prayer times, Quran reader, UPI donation tracking with OCR receipt verification, push notifications and a WhatsApp bot all run off one Firebase backend.

Stack: React Native, Expo, TypeScript, Firebase, Zustand, GCP Vision

Kivquo School ERP with 93+ API endpoints

2026 · Full-Stack Developer & Team Lead · School management platform

A complete school management platform covering ten user roles with scoped RBAC behind a Fastify + PostgreSQL API. The academics suite handles attendance, exams and grades, timetable versioning, homework and real-time bus tracking with live location updates.

Stack: React Native, Expo, Fastify, PostgreSQL, Firebase Auth, TypeScript

Maison Premium fashion e-commerce platform

2025 · Full-Stack Developer · Fashion retail

A premium fashion storefront built on Next.js 16 and React 19, with advanced product filtering, cart, wishlist and a three-step checkout with coupon support. An admin dashboard handles revenue analytics, product and order management, dynamic content and a points-based loyalty program.

Stack: Next.js 16, React 19, Tailwind CSS 4, Prisma, PostgreSQL

EXPERIENCE

January 2025 Present Technical Lead, Found Solutions

Leading technical initiatives and guiding the team in designing and delivering scalable software. I own architecture decisions, run code reviews, keep coding standards in place, and coordinate with stakeholders to translate business requirements into technical implementations.

January 2026 April 2026 QA Engineer Analytics, Unicourt Mangalore Infotech

Worked on real-world court-related projects, extracting actionable insights from complex legal datasets. Ran quality assurance and data validation to keep analytics outputs accurate, and collaborated across teams to streamline data pipelines and reporting.

July 2025 October 2025 Salesforce Intern, Novigo Solutions
